NEW PATENT PIANOS.

RAVEN & BACON, Manufacturers of PIANO-FORTES with RAVEN-KEYS and RAVEN-BOARDS. Patented April 16, 1866.

This invention introduced exclusively into our pianos, is the greatest advantage to the tone of the instrument, as it affects the sound-board—very little vibration, and much greater power.

It is also increased in quality and power to that of the ordinary piano. The sounding-board, released from its connection with the piano-case and resting upon soundings, is relieved from the rigidity of the frame, and thus gains in power and in tone.

All hours of this eminently household instrument, as well as parties proceeding to purchase new pianos, are invited to call and examine our works. W. A. WADDELL, No. 120 Broadway, New York.
